CODE MANAGEMENT

From the Tools menu, select Code generation.

The list of Code templates is displayed:

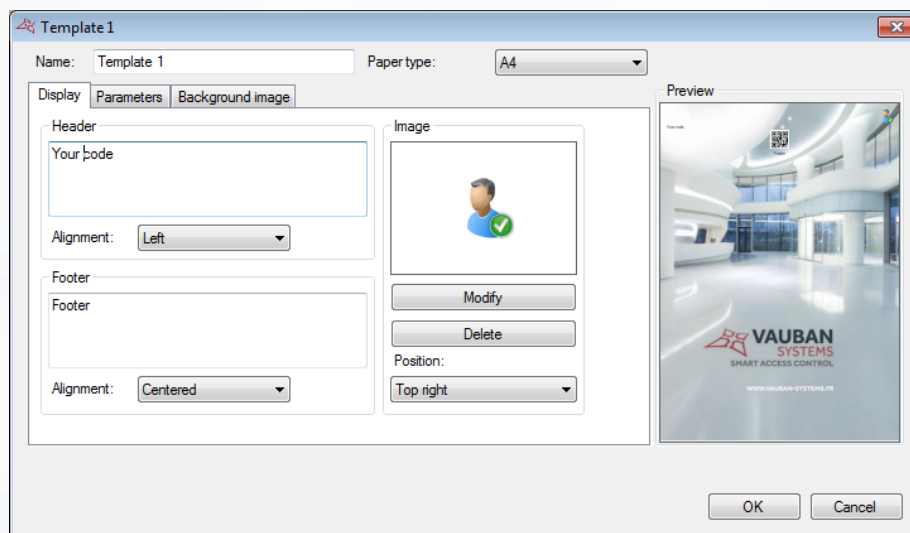

ADDING A CODE TEMPLATE

Click "Add" from the list of Code templates.

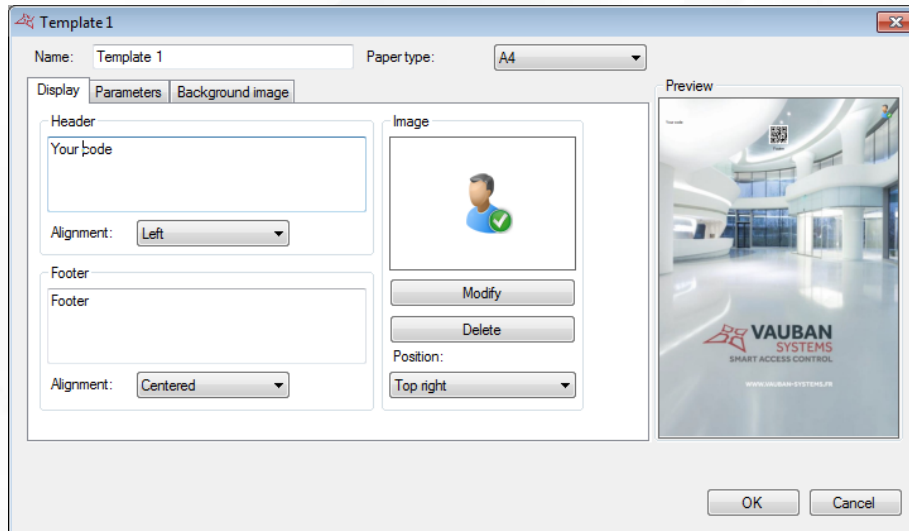

GENERAL INFORMATION

You can:

- + Choose a name for your template.
- + Choose paper type (ticket or A4) to print out your codes.
- + Use tabs to adjust your code.
- + View the result via the preview.

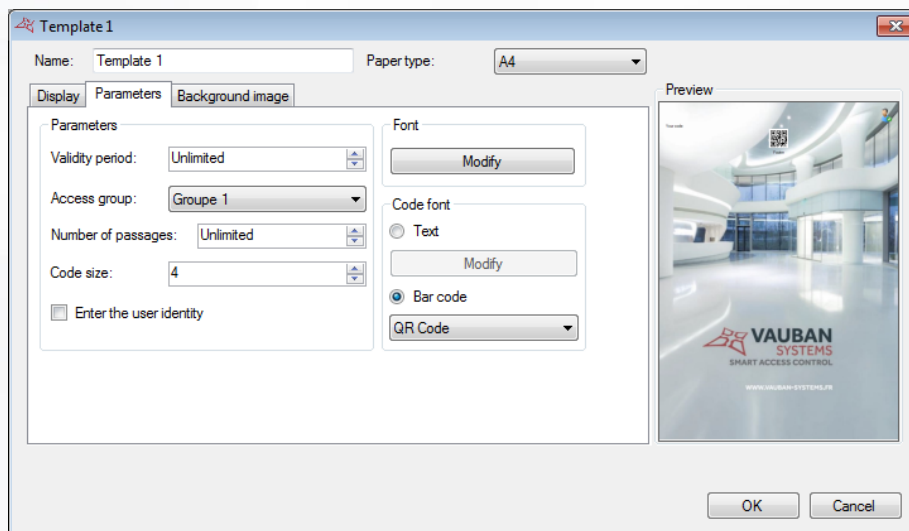

DISPLAY TAB

From this tab, you can:

- + Define the text and position of the header to use.
- + Define the text and position of the footer to use.
- + Choose a logo and its position.

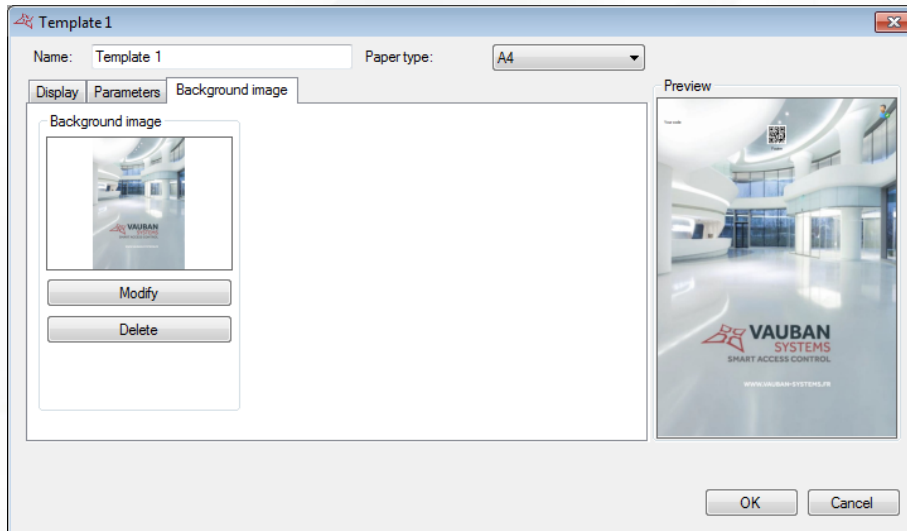

SETTINGS TAB

From this tab, you can:

- + Adjust the generated code:
 - o Set its period of validity.
 - o Set the access group with which the code will be associated.
 - o Set the number of passages authorised for this code.
 - o Set the number of digits that will make up the code (between 4 and 9).
 - o Set whether the user's identity should be entered when generating a code.
- + Choose the font and size of text to use by clicking on "Modify".
- + Choose a code format to use:
 - o Text format, in which case it is possible to customise the font.
 - o Barcode format, type Code39 () or QRCode ().

BACKGROUND IMAGE TAB

From this tab, you can:

- + Choose a background image to be used. The image must be in jpg, bmp, gif, png or pdf format.

Warning: this tab is available only for A4 paper type.

MODIFYING A CODE TEMPLATE

Click "Modify" in the list of Code templates.

The windows are then the same as for adding a Code template.

DELETING A CODE TEMPLATE

Click "Delete" in the list of code templates.

Validate the confirmation request.

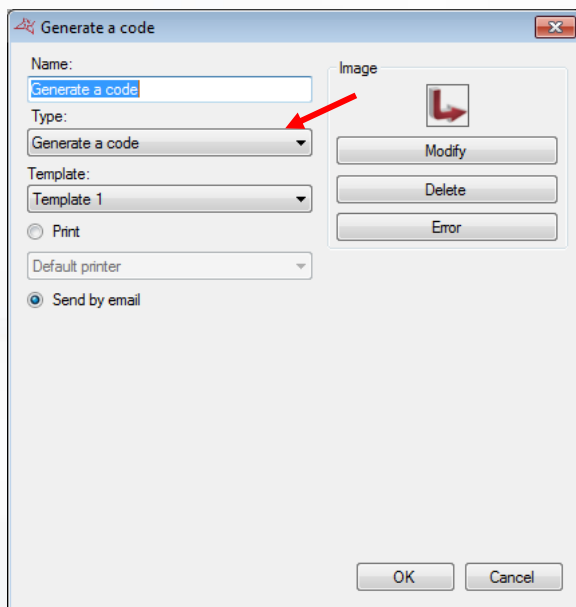

Warning: deletion is permanent.

GENERATING A CODE USING A TEMPLATE

To generate a code, use a "Generate a code" shortcut.

Click on the  button to create a new shortcut.

Via the creation window, you can:

- + Choose a "Generate a code" shortcut.
- + Choose a template to be used.
- + Choose whether to print it or to send it by email.

Activating this shortcut will create a code.
